## LFP12300(12.8V300AH)

Document:Lithium Battery datasheetDoc. Version:V4.0Issue Date:1-1-2024

## **Overview**

NEATA Lithium iron phosphate battery module which designed for storage and power supply system application.

This battery module integrated with intelligent BMS with big advantages on safety, cycle life, energy density, temperature range and environmental protection.

This product specification describes the type, size, structure, electrochemistry performance, service life, and BMS characteristics.

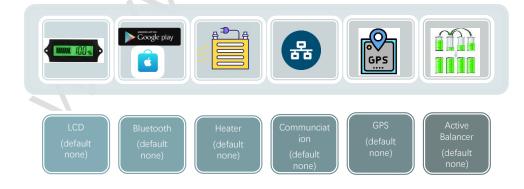

The specification will be updated based on different customer requirement.

### Advantages

The battery module consists of LFP cells, wire, BMS and ABS container.

- Packed with high performance LFP single cell, long life, safety and wide temperature range
- High energy density, small size, light weight, no pollution;
- Packing with single cell container, fire retardant wire and copper connecting bar, stable and safe.
- Built-in BMS, with battery voltage, current, temperature and health management.
- LCD(optional) indicate the battery SOC and operating status.
- Support Max 4pcs in series.
- Flexible customization of dimensions
- More than 15 years design life, Stable performance, maintenance-free

## Customization Functions

SHENZHEN NEATA POWER TECH CO.,LTD Reminder:

Note 1: Please always refer to the latest edition of our technical datasheet that published on our website to ensure safe and efficient operation.

#### **Battery specification**

ELECTRICAL SPECIFICATIONS		BMS SPECIFICATIONS		
Cell Type - Chemistry	LiFePo4	Version	Softversion	
Nominal Voltage	12.8V	Code	J-B04S300	
Amp Hour Capacity	300AH	Primary Charge Current Protection	320±10A	10S±3S
Dimensions	521*268*220mm	Second Charge Current Protection	NA	
Weight	27.5±0.2kgs	Third Charge Current Protection	NA	
Terminal Type	M8	High Voltage Protection	15±0.2V	2S±1S
Case Material	ABS-Sealed	Reconnect Voltage	14.4V	
Case IP Rating	IP65	Primary Discharging Current Protection	320±10A	10S±3S
Series connections	Max to 51.2V	Second Discharging Current Protection	1300±120A	0.3S±0.2S
Parallel connections	No limited	Third Discharging Current Protection	NA	
Storage Temperature	(-10 to 40°C)	Low Voltage Protection	8.8±0.4V	
Resistance - Milliohms	< 10	Reconnect Voltage	10.4±0.4V	
Self Discharge per Month	< 2%	High Temp Protection	65±3°C	
CHARGE SPECIFICATIONS		Reconnect Temp	50°C	
Floating Charge Voltage	≤13.8V	Balancing voltage	13.2±0.2V	
Boost Charge Voltage	≤14.2V	Balancing current	200±50mA	
Recommend Charge Current	≤60A	Shortage current	1800±300A	
Max Charge current	≤300A			
Charge current (0 to -10°C)	<0.1C			
Charge currrent (-20 to -10°C)	<0.05C	0		
Charge Temperature	(0 to 45°C)			
DISCHARGE SPECIFICATIONS				
Recommend Discharge current	≤300A			
Max Cont Discharge current	≤320A			
Max Disharge Voltage	≥10.4V			
Discharge Temperature	(-20 to 60°C)
